

We are excited to recommend our new and completely web-based PDF submittal system, 4submittal. Based on feedback from our previous system and after researching new features and capabilities, we are proud to offer a best-in-class solution. Since its inception in 2021, 4submittal already has a solid customer base, and the feature list continues to grow!

Web-based

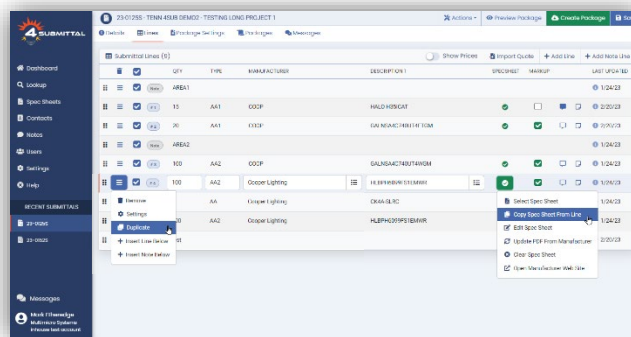

- Completely web-based, accessible from anywhere with a browser and internet connection
- No installation required, new features added seamlessly in the background
- Submittal Library and PDF Spec Sheet Library stored in the cloud
- Spec sheets can be linked easily by Manufacturer URL, allowing for automatic updates – you always have the latest version!

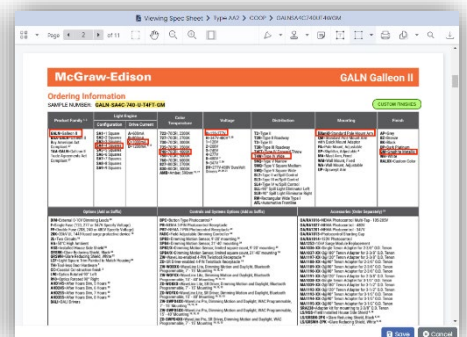

Your library, accessible from anywhere

Loaded with powerful tools and features

- Built-in, feature-rich markup tool
- Duplicate Line and Copy Spec Sheet from Line (including markups) for fast and efficient package-building
- Insert/Move/Delete line items or note lines as needed
- Build and access your library of spec sheets quickly and easily

Easily add and manipulate line items

Powerful, built-in markup tool

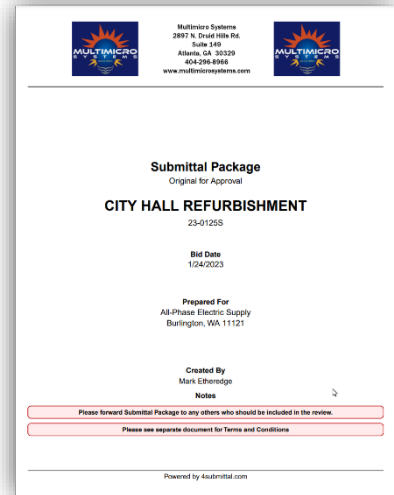

Import-capable

- Import manufacturers and contacts from Sales Assistant or from worksheet
- Import quote line items from Sales Assistant or from worksheet

Designed for customizable, professional-grade and easy-to-distribute output

- Numerous customizable options for cover sheet, bill of materials, spec sheet header
- 2-way hyperlinks in finished package for quick jump to individual spec sheets
- Watermark feature
- French-language output support
- Option to include Price column
- Email or copy finished package weblink to customer or associates
- Integrated email/SMS communications
