

## Multimicro Systems Cloud Solution

In today's world more and more companies have multiple offices or are allowing their employees to telework. This entails creating an infrastructure that will allow secure remote access to your company's data. This usually means purchasing expensive servers and licenses and someone that can manage both.

### **Why use Multimicro Systems Cloud Solution for Cahill Sales Assistant:**

- No expensive server needed, if you don't already have a server no need to purchase one.
- No expensive licensing, use the licenses from your current products like Microsoft Excel, Word, Outlook
- Turnkey approach, Multimicro Systems sets it up for you and will move your data to the Cloud.
- The data is automatically backed up, no need to pay for expensive backup software
- We use proven leaders in cloud technology: Amazon, Google, Citrix, Dropbox, Microsoft Visual Studio, MYSQL etc.
- Run on windows or mac using parallels
- Avoid downtime from Server Maintenance, Ransomware and Viruses.
- Unlimited number of users! Scale quickly and Grow your business.

It's a perfect solution for multi-office organizations and it's getting great reviews from current Cahill Sales Assistant customers.

The pricing for the cloud is only for hosting, not the Sales Assistant license fees. So moving forward there will be a yearly Cloud hosting fee and the Sales Assistant Annual support payments. Cloud hosting license are bought upfront.

### **Cahill Sales Assistant Cloud Minimum System Requirements**

- .Net Framework 4.0, Internet access
- Windows 7, Windows8 or Windows10 or MAC running parallels for thin client
- The more memory the better the performance. We recommend at least 4GB for thin client, 8 GB for power user.
- Storage size - The current storage solutions allow 100 GB for the database, the Filing Cabinet is unlimited
